Introducing Family Portal!

A New Resource for Families

family PORTAL

What is Family Portal?

Family Portal is an innovative platform designed to empower families—including parents, guardians, and other family members—with essential tools and information to support their students' educational journey. The portal provides direct access to student assessment results, beginning with the spring 2026 ND A+ Summative Assessment results, which will be released in the summer of 2026.

What You'll Find in Family Portal

On-Screen Assessment Results and How to Interpret Them

Test level details, including scale scores and performance levels, will be displayed on screen for family members to easily see how their student performed. Resources to help interpret scores will be available for viewing or download.

Personalized Video Report

Each score report is accompanied by a personalized video featuring student-specific animation and narration. These videos guide family members through student assessment results and provide a brief explanation of what they mean.

Downloadable Full Reports

Family members can access and download the complete Individual Student Report (ISR), which provides detailed information about their students' performance.

User-Friendly, Multilingual Access

Family Portal is designed for accessibility and ease of use across various devices, including laptops, tablets, and smartphones. Users can easily toggle between English and Spanish directly from the homepage. Please note, the site and personalized video report are offered in both languages, but the full report is currently only available in English.

Secure Login Process

Family Portal protects the privacy and security of student data. Access is granted through a secure, device-friendly browser link. To log in, family members will need the following student-specific credentials:

- Student State ID (SSID) – A unique 10-digit identification number, available from the student's school or district.

- Student Last Name

- Student Date of Birth
